MERN Stack Developer

SUMMARY

Results-driven MERN Stack Developer with **3+ years of hands-on experience** delivering **scalable, high-performance web applications**. Specialized in building **RESTful APIs**, **real-time features with Socket.IO**, and **cloud deployments on AWS**. Proven track record of **reducing page load times**, **improving system** reliability, and collaborating in **cross-functional teams** to **ship production-ready products** on schedule. Seeking a **Senior Engineering role** to drive meaningful product impact.

EXPERIENCE

Sep 2025 - Present

Product Engineer(React & Node)

VAYUZ Technologies Noida U.P

- Architect and develop full-stack product features using **React.js, Node.js, and MongoDB**, contributing to a B2B SaaS platform used by **5,000+ active users**.
- Implemented modular RESTful API endpoints with Express.js, reducing average **API response time by 30%** through efficient query design and caching strategies.
- Integrated **AWS Cognito** for enterprise-grade user authentication, eliminating security vulnerabilities and supporting **OAuth 2.0 / SSO flows**.
- Collaborated in bi-weekly sprints with product, design, and QA teams consistently delivering features within deadline with **zero critical production bugs**.

Jun 2023 - Aug 2025

MERN Stack Developer

Delimp Technology Noida U.P

- Built and maintained **6+ production-grade full-stack web applications** using MongoDB, Express.js, React.js, and Node.js, serving concurrent user loads of up to **2,000+ sessions**.
- Designed and optimized MySQL and MongoDB schemas, reducing complex **query execution time by up to 45%** through indexing and denormalization strategies.
- Implemented **real-time bidirectional communication using Socket.IO** (WebSockets), enabling live notifications and chat features with sub-100ms latency.
- Developed dynamic RESTful APIs consumed by both web and mobile clients, handling **50K+ requests per month** with **99.9% uptime**.
- Integrated third-party services including payment gateways, Google Maps API, and **AWS S3** for media storage reducing **asset load time by 35%**.
- Mentored **2 junior developers** through code reviews and pair programming, improving team code quality and reducing **PR review cycles by 20%**.

EDUCATION

Jul 2020 - Oct 2023

Bachelor of Computer Applications (BCA)

Mar 2019 - Mar 2020

JS University Shikohabad U.P
Senior Secondary (12th)

Mar 2017 - Mar 2018

St. Xavier's School Ballia U.P
High School (10th)

St Thomas Ballia U.P

SKILLS

React.js | Next.js | TypeScript | Redux | TanStack Query | Node.js | Express.js | WebSocket / Socket.IO | MongoDB | MySQL | AWS S3 | AWS EC2 | AWS Lambda | AWS Amplify | Git | GitHub | CI/CD pipelines

PROJECTS

Haystak Desktop App

- Built a macOS desktop application that monitors developer tools and indexes local data to cloud storage for centralized access adopted by a 50+ person engineering team.
- Engineered a Node.js + Golang backend pipeline that processed and synced 10GB+ of local data with MongoDB, achieving sync times under 3 seconds.
- Designed a Redux + Context API state architecture that eliminated prop-drilling across 30+ components and reduced re-render cycles by 40%.

Tech Stack - Golang · Node.js · React.js · Redux · MongoDB · TanStack Query

SideHustl (Real-Time Collaboration App)

- Developed a real-time collaboration platform with WebSocket-based live updates, supporting up to 500 concurrent users with sub-150ms message delivery.
- Built a scalable Node.js + Express.js backend with horizontal scaling support, handling peak loads of 10,000+ events per minute without degradation

Tech Stack - React.js · Node.js · Socket.IO · Express.js · MongoDB

Bold Portable (Location-Based Rental)

- Developed a scalable location-based rental platform using Next.js, enabling users to discover and access nearby available products through Google Maps API integration.
- Implemented real-time inventory management with Socket.IO to provide instant product availability updates and improve operational efficiency.
- Built dynamic QR code generation and scanning workflows for seamless product access, verification, and rental management.

Tech Stack Next.js · Socket.IO · Google Maps API

ACHIEVEMENTS

Open Source npm Package React.js · TypeScript · CSS

- Built and published an open-source React component library enabling drag-and-drop and resizable UI components, achieving 5,000+ weekly downloads on npm with adoption across the global developer community.
